TILE ADHESIVE

Perfect Fix for a superior floors

RENAFIX 201

A Cementitious polymer modified tile adhesive designed for the installation of all types of Ceramic tile and small format natural stones over concrete and on a variety of cement substrates.

KEY FEATURES

- Ready to use, just add water
- Easy mix and fast application
- Excellent adhesion, low shrinkage
- For fixing ceramic tiles over floors

AREAS OF APPLICATION

- For interior floors
- Can be used for a variety of ceramic tiles and small format natural stones
- Suitable for substrates like, Concrete slabs, Cement mortar beds, cement plaster, cement terrazzo, cement screed, conventional renders, existing natural stone, etc...

APPLICATION

- Always, use an appropriate standard notched trowel for application
- Spread the tile adhesive not more than 1 sq.m. at a time, comb it to the required depth using a suitable notched trowel
- Place the tile/stone in the wet adhesive and adjust the tile by pressing the tile firmly into a position with a twisting action.
- Use a beating block or a rubber mallet to embed the tile properly
